

ACKNOWLEDGEMENT

First of all, the author would like to express his deep gratitude to Dr. Min Zaw Aung, Pro-Rector of Technological University (Mawlamyine), for his permission completion of this thesis.

The author would like to express special thanks to Dr. Thu Thu Mon Oo, Professor and Head, Department of Information Technology, Technological University (Mawlamyine), for her kind support while the author was conducting experiments at this university.

The author is deeply thankful to his supervisor, Daw Than Win, Associate Professor, Department of Information Technology, Technological University (Mawlamyine), for the opportunity to work with her and her invaluable suggestions and constant encouragement which led to improve the presentation quality of this thesis.

The author would like to express his thanks to Daw Nyein Nyein Thu, Lecturer, Department of Information Technology, Technological University (Mawlamyine), for his patience, kindness and helpful suggestions.

The author is also very thankful to Daw Phyo Ngwe Hlaing, Demonstrator, Department of Information Technology, Technological University (Mawlamyine), for her kind, precious help and suggestion for thesis writing.

The author would like to deeply express his deepest gratitude to his parents who specially offered strong moral and physical support, care and kindness.

Then, his endless remembrance is given to his all teachers of Technological University (Mawlamyine) and friends for their friendship, supports and encouragement during his student life.

The author would like to thank Buddha, for letting him through all the difficulties. The author has experienced his guidance day by day. Buddha is the one who let him finish his degree. The author will keep on trusting him for the future.

Finally, the author must not forget to give his thanks to all people who made a valuable contribution to the success of this mini thesis.
